

Technology Stack

Date	01 July 2026
Team ID	To Be Assigned
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML, CSS, Bootstrap	Provides a responsive and user-friendly interface for credit card application input and result visualization.
2	Backend / Server-Side	Python, Flask	Handles routing, form processing and machine learning model integration efficiently.
3	Database / Data Storage	CSV Dataset, Pickle Models	Stores training data and serialized machine learning models for prediction.
4	Cloud / Hosting / Deployment	IBM Cloud / Local Flask Server	Supports deployment, accessibility and future scalability of the application.
5	Version Control & CI/CD	Git, GitHub	Enables collaboration, source code management and version tracking.
6	Third-Party APIs / Other Tools	Scikit-learn, Pandas, NumPy, Matplotlib	Used for preprocessing, model training, prediction and visualization.
