

Problem-Solution Fit

Date	01 July 2026
Team ID	To Be Assigned
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

1. CUSTOMER SEGMENTS [CS] Credit card applicants, banks and financial institutions.	6. CUSTOMER LIMITATIONS [CL] Limited credit history, low income, lack of financial awareness.	5. AVAILABLE SOLUTIONS [AS] Manual review systems. Pros: Human judgement. Cons: Slow and inconsistent.
2. PROBLEMS / PAINS [PR] Long approval time, uncertain decisions and repeated document verification.	9. PROBLEM ROOT / CAUSE [RC] Manual processes and inefficient risk assessment.	7. BEHAVIOR [BE] Applicants frequently check application status and seek quick responses.
3. TRIGGERS TO ACT [TR] Need for loans, purchases and financial flexibility.	10. YOUR SOLUTION [SL] An ML-powered credit card approval prediction system using Flask and machine learning models for fast and accurate decisions.	8. CHANNELS OF BEHAVIOR [CH] Online: Banking portals, mobile apps. Offline: Bank branches.
4. EMOTIONS [EM] Before: Anxiety and uncertainty. After: Relief if approved, disappointment if rejected.
