

Code Layout, Readability and Reusability

Date	01 July 2026
Team ID	To Be Assigned
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

S.No	Code Quality Parameter	Description	Followed	Remarks
1	Consistent Indentation	Uniform spacing and indentation used throughout the codebase.	Yes	PEP-8 formatting followed.
2	Proper File Structure	Files and folders are logically organized.	Yes	templates/, static/, dataset/, model/ structure maintained.
3	Meaningful Variable Names	Variables reflect their purpose clearly.	Yes	Descriptive names improve maintainability.
4	Function / Method Names	Functions are descriptively named.	Yes	Prediction and preprocessing methods are clear.
5	Code Comments	Inline and block comments explain logic.	Partial	Important sections documented.
6	Modular Design	Code is split into reusable functions and modules.	Yes	Training and prediction separated.
7	No Redundant Code	Duplicate or unused code is removed.	Yes	Reusable functions minimize duplication.
8	Error Handling	Exceptions and errors are handled gracefully.	Yes	Input validation and exception handling implemented.

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	Prediction Module	Python, Scikit-learn	Flask app and testing	High
2	Preprocessing Pipeline	Pandas, NumPy	Training and inference	High
3	Frontend Templates	HTML, CSS	Input and result pages	Medium
4	Model Loader	Pickle	Application startup	High
5	Visualization Module	Matplotlib	Reports and analytics	Medium

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well-organized folder structure and modular design.
Readability	5	Consistent naming conventions and formatting.
Reusability	5	Modules reused across training and deployment.
Documentation / Comments	4	Core functions documented with comments.
Overall Score	4.8/5	Maintainable and extensible codebase.
