

Date	01 July 2026
Team ID	To Be Assigned
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

S.No	Feature Name	Feature Description	Module / Component	Status	Marks Contribution
1	Application Form	Collects applicant details such as age, income, employment status and credit information through a web interface.	Frontend UI	Done	0.5
2	Input Validation	Validates all user inputs and prevents missing or invalid values before prediction.	Frontend + Backend	Done	0.5
3	Data Preprocessing	Performs encoding, feature scaling and transformation before model inference.	ML Preprocessing	Done	1.0
4	Credit Card Approval Prediction	Predicts whether the application will be approved or rejected using trained machine learning models.	Prediction Engine	Done	1.0
5	Model Comparison	Compares multiple machine learning algorithms to select the best-performing model.	Training Module	Done	0.5
6	Results Dashboard	Displays approval status, confidence score and prediction output in a user-friendly format.	Frontend	Done	0.5
7	Model Persistence	Loads trained .pkl models dynamically during application execution.	Backend	Done	0.5
8	Error Handling	Handles invalid inputs, runtime exceptions and prediction failures gracefully.	Application Layer	Done	0.5
