

Demonstration of Proposed Features

Date	01 July 2026
Team ID	To Be Assigned
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

This document captures all the features proposed for the Credit Card Approval Prediction project and tracks whether each feature was implemented and demonstrated during project execution.

S. No	Feature Name	Description	Status	Demonstrated	Remarks
1	Applicant Data Entry Form	Collects applicant details such as income, employment and credit score through the web interface.	Implemented	Yes	Successfully demonstrated during testing.
2	Input Validation	Validates mandatory fields and prevents invalid values before prediction.	Implemented	Yes	Handled invalid data correctly.
3	Data Preprocessing	Performs encoding, scaling and feature transformation before prediction.	Implemented	Yes	Integrated with prediction pipeline.
4	Credit Card Approval Prediction	Uses trained machine learning model to predict approval or rejection.	Implemented	Yes	Core functionality demonstrated.
5	Results Dashboard	Displays prediction results and approval status to the user.	Implemented	Yes	Output page displayed successfully.
6	Model Comparison	Compares multiple ML algorithms and selects the best-performing model.	Partial	Yes	Implemented during model evaluation phase.

Total Features Proposed	6
Total Features Implemented	5
Total Features Demonstrated	6
Overall Implementation Rate (%)	91.6%
